Rohm and Haas Co.; Approval of Pesticide Product Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of applications to register the pesticide products RH-5992 Technical and Confirm 2F, containing an active ingredient not included in any previously registered products pursuant to the provisions of section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Richard Keigwin, Product Manager (PM) 10, Registration Division (7505C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 210, CM #2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703) 305-6788; e-mail: keigwin.richard@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of April 29, 1994 (59 FR 22160), which announced that Rohm and Haas, Independence Mall West, Philadelphia, PA 19105, had submitted applications to register the pesticide products RH-5992 Technical and Confirm 2F (EPA File Symbols 707-EGT, 707-EGJ), containing the active ingredient tebufenozide benzoic acid 3,5-dimethylethyl-2-(4-ethylbenzoyl)hydrazide at 97.1 and 23.0 percent respectively, an active ingredient not included in any previously registered products.

On May 15, 1995, EPA approved one technical and one end-use product listed below:

1. RH-5992 Technical (EPA Registration Number 707-237) for repackaging, relabeling, formulation, or processing use only.

2. Confirm 2F (EPA Registration Number 707-238) for use to control the lepidopterous pest on walnuts.

The Agency has considered all required data on risks associated with the proposed use of tebufenozide benzoic acid 3,5-dimethylethyl-2-(4-ethylbenzoyl)hydrazide, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health safety determinations which show that use of tebufenozide benzoic acid 3,5-dimethylethyl-2-(4-ethylbenzoyl)hydrazide when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

More detailed information on these registrations is contained in a Chemical Fact Sheet on tebufenozide benzoic acid 3,5-dimethylethyl-2-(4-ethylbenzoyl)hydrazide.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1132, CM #2, Arlington, VA 22202 (703-305-5805). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St., SW., Washington, D.C. 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

SUPPLEMENTARY INFORMATION: The Department of Energy is proposing to use the Waste Isolation Pilot Plant (WIPP), located in Eddy County, New Mexico, as a deep geologic repository for the disposal of transuranic radioactive waste generated by nuclear defense activities. The 1992 Waste Isolation Pilot Plant Land Withdrawal Act, (Pub. L. No. 102-579), calls for the EPA to perform several regulatory activities for the WIPP including: (1) issuing radioactive waste disposal standards; (2) establishing criteria for the EPA to determine whether the WIPP complies with the radioactive waste disposal standards; and (3) certifying whether the DOE's WIPP facility complies with the disposal standards, based on a DOE submitted compliance certification application. See section 8 of the WIPP Land Withdrawal Act. The WIPP Land Withdrawal Act prohibits the DOE from commencing with the emplacement of transuranic waste for underground disposal at the WIPP until the EPA certifies that the facility will comply with EPA's radioactive waste disposal standards. See section 7(b) of the WIPP Land Withdrawal Act.

The EPA has issued final radioactive waste disposal standards, which are codified at 40 CFR part 191. See 58 FR 66398 (Dec. 20, 1993). The EPA has also proposed criteria for certifying whether the WIPP facility will comply with EPA's radioactive waste disposal standards. See 60 FR 5766 (Jan. 30, 1995). After considering a request to extend the initial public comment period and in order to provide an opportunity for the public to comment on the proposed compliance criteria in light of the DOE's draft compliance certification application, the EPA recently announced that it was reopening the public comment period on the proposed compliance criteria. See 60 FR 39131 (August 1, 1995). The public is referred to the December 20,

1993 and January 30, 1995 **Federal Register** notices for more detailed information about the EPA's regulatory activities at the WIPP.

The DOE submitted a draft compliance certification application to the EPA in two parts on March 31, 1995 and July 31, 1995, respectively. The DOE intends for this draft application to provide preliminary information on data gathered for the WIPP and to solicit feedback regarding the technical adequacy of the data in an effort to prepare for its final compliance certification application. The EPA staff will conduct a technical review of the draft application and provide comments to DOE on its technical adequacy. By this notice, the EPA is inviting the public to participate in the review of the draft application, available at the public dockets identified above, by submitting written comments for the EPA's consideration in its staff-level technical review of the draft application. The EPA's technical review of the draft application is not subject to the notice-and-comment rulemaking requirements of the Administrative Procedure Act, 5 U.S.C. 553, and the EPA does not plan to provide written response to the public comments submitted. However, public comments on the DOE's draft application which are submitted to the EPA will be available at EPA Docket No. A-93-02 along with the EPA's review comments.

The EPA's review of the DOE draft application is not a final EPA action and has no binding legal effect. The Agency cannot, by law, approve or certify any part of the draft application. Further, the EPA has not issued the final criteria for determining whether the WIPP facility is in compliance with the radioactive waste disposal standards. The Administrator of the EPA will determine whether the WIPP facility is in compliance with the EPA's radioactive waste disposal standards only after the Agency issues final compliance criteria, receives a final DOE compliance certification application based on the final compliance criteria, and conducts a WIPP certification rulemaking proceeding in accordance with the Administrative Procedure Act rulemaking requirements at 5 U.S.C. 553. In addition, before the Administrator of the EPA makes any final WIPP certification determination, the EPA will issue a proposed determination in the **Federal Register** and provide an opportunity for public comment on the proposal. The subsequent final certification determination by the Administrator will consider the comments received in

response to the proposal and be accompanied with a reply to significant public comments.

Dated: August 10, 1995.

Mary Nichols,

Assistant Administrator, Office of Air and Radiation.
